

THE EUROPEAN YOUTH ADVISORY BOARD

We want the European Union to finance and help create a governing board for the European Commissioner consisting of 56 members from 28 countries (2 people from each country)

Group Members:

Joshua, Julia, Paul, Donato, Mariam (The UK, Hungary, Italy, Romania)

SUMMARY

We would like to highlight the importance of youth participation and how the more we participate and gain political awareness the more educated the Youth become on serious topics while also giving direction towards politicians and where funding should go to or be invested in. In order to create the right strategic plan to tackle youth unemployment within Europe on a pedantic level, we first of all must reach out to the big university/charities to help with our selection. We will give them the criteria and what we expect from the right person to fill this position and do it to a great standard in order to create actually change. The second step would be to create a democratic system amongst the selected to vote for who should be the main speaker on behalf of the "The Youth Union". Presenting all the countries issues in a presentable way which explains in detail what is going in these countries what the actually struggles are and how we can present solutions that they can implement allowing us to have better futures We understand not every problem can be solved but with the right direction from the right group of people we can make enough small steps to make big changes. We would like to make government officials aware of these issues we face as young people on unemployment as we decide our fate and we should have a say in what gets invested into us.

PROBLEMS

The problem is the European Commissioner are trying to fix issues on unemployment with a universal strategy which doesn't work as unemployment in each country has its own problems which requires individual attention. Youth unemployment comes with several contributing factors, such as lack of jobs, poverty, lack of vocational skills course, lack of opportunities, education and a lot more. The problems we are facing isn't been handled in the right way, we need more active youth participation when it comes to the future of young people. The European structure isn't not a transparent one making it extremely

Erasmus+

difficult for young people to understand let alone get involved. The top to bottom system does not work and politicians are not being held accountable for their actions.

ACTIONS

This proposal we are trying to create is to help the European do a better job in regard to youth unemployment. A proposal that allows every youth to get their voice heard. We want the European union to fund this idea and make it mandatory for anyone who takes up the position of European commissioner of unemployment to seek consulting sessions from this group to provide them with more details on our struggles with unemployment. We want the European Union to ensure this organisation is to be recognised on a national level. The European Youth Union. Should be consulted before any government action is made. The people selected the main values behind this idea would be to reduce unemployment through youth participation so as we can also prepare and educate people on the economy, they currently live in.

FINAL CLAIM

We want to show you that the situation we face is much more serious and we need immediate solutions as being a young person in today's age is getting harder by the minute. Give us the opportunity to help you help us solve these issues.
